

Resolution No. 2019-06

Subject: Installation of Water and Oil Separator on Dimond Blvd. (Jewel Lake)

Calling on the Municipality of Anchorage and Anchorage Water & Wastewater Utility to install a water and oil separator on the outlet end of the culvert that drains from the South to the North into Jewel Lake.

Whereas; an ongoing problem exists since this culvert carries surface water from approximately ten acres as well as the drainage from Dimond Blvd

Whereas; traffic along Dimond Blvd. has increased logarithmically over the last five (5) years due to development to the West

Whereas; this drainage has caused increased degradation of the water quality of Jewel Lake

Now, Therefore; the Sand Lake Community Council recommends that a water and oil separator be installed at the earliest possible date, or no later than spring of 2020.

Adopted, this 9th day of December, 2019 by the Sand Lake Community Council.
