

# Do you have beetle-attacked spruce trees?

Many properties in the neighborhood have had spruce bark beetle attacks, leaving trees dead or weakened and vulnerable to

**windstorms. – Don't wait until the next storm to deal with tree removal!**

Homeowners insurance does not cover damage caused by a dead or sick tree – Stay ahead of preventative maintenance and protect your home.

If you live in Airport Heights and are interested in having dead and damaged trees removed at a **bulk rate** this spring, contact Tyler Boyes ([boyestylerl@gmail.com](mailto:boyestylerl@gmail.com)) or come to the Unitarian Universalist Fellowship on 3/11/2020 at 6PM to learn more!

(This work is not limited to spruce trees –If you have cottonwood, mayday, damaged birch, etc. that need removal, they are also eligible for this project)
