

COMMUNITY ACTION ALERT

Merrill Field is proposing new approach and departure procedures that may require removing homes. The specific proposal is from the Municipality to the Federal Aviation Administration asking them to accept locally produced Instrument Flight Rule (IFR) procedures. This action typically results in new safety standards including wider safety margins. Of particular interest is the potential expansion of the Runway Protection Zone (RPZ).

The Fairview Community Council has organized a meeting with Merrill Field and FAA officials to learn what this action may mean to homeowners, residents and to the Fairview neighborhood.
