Subject: ML&P 36 Avenue Vault/Duct Project  
P-10-79, Work Order #10360, Work Sketch # 7484

Dear Council Members:

Municipal Light & Power (ML&P) has a construction project to install a vault/duct system and replace four existing vaults along the north side of 36<sup>th</sup> Avenue, from Lake Otis Parkway to the New Seward Hwy. A continuous vault/duct system will be installed from Lake Otis to approximately 400 feet west of MacInnes Street, an existing vault at that location will be replaced, and existing vaults will be replaced near the intersections of Cottonwood Street, Latouche Street, and New Seward Highway

The construction activities are scheduled to begin after Memorial Day, and are anticipated to continue for approximately three months. Due to the construction activities there will be detours for vehicle and pedestrian traffic, and road closures during some evenings and weekends. ML&P has developed a traffic control plan with the Municipal Traffic Department, which will have signs for the detour routes and notices of road closures.

ML&P would appreciate your support of this project, by informing those in your area about the up coming project, and the traffic delays that may occur due to the volume of vehicles using this road. If those in the area have an alternate route which avoids the construction area, it may save them time in getting to their destination.
