

## Automated Sideloader Operating Parameters

Note: The attached diagram is designed to provide a general reference for safe operating distances for typical automated sideloading refuse collection vehicles. Some service locations may have unique characteristics that may require additional evaluation to allow for roll cart service.

### Roll Cart Dimensions

96-gallon roll cart  
64-gallon roll cart  
48-gallon roll cart

Height	Width	Depth
43"	30"	36"
42"	24"	32"
38"	24"	29"

Presented to the Roger's Park Community Council to support continuation of alley service of residential refuse collections with automated refuse and recycling roll carts as prescribed by municipal code.
